

GULLE, JHON PAUL E.

JUNIOR REACT FRONT END DEVELOPER/WEB DEVELOPER

Enthusiastic and detail-oriented with hands-on experience in website design and development. Specializes in enhancing performance through scalable ad-serving platforms. Demonstrated success in designing adaptive solutions, showcasing technical proficiency. A creative thinker dedicated to crafting efficient, user-friendly web solutions. Eager to apply and expand skills in a dynamic, collaborative environment.

WORK EXPERIENCE

REACT DEVELOPER (FRONT-END)

Mabolotech Company 2022-2025

Project: JobsQ

JobsQ was developed by our company to address the need for a streamlined job search and recruitment platform. The application benefits job seekers by providing easy access to a diverse range of opportunities and empowers employers to connect with qualified candidates efficiently. With JobsQ, our goal is to create a platform that enhances the overall experience for both job seekers and employers in the competitive job market.

Responsibilities

- Spearheaded the development and implementation of key features in the JobsQ application, focusing on precision job matching algorithms to enhance the platform's efficacy in connecting job seekers with relevant opportunities.
- Led the front-end development efforts for JobsQ, taking a key role in creating intuitive user interfaces, optimizing the application's frontend architecture, and enhancing the user experience to streamline the hiring workflow efficiently.
- Successfully collaborated with cross-functional teams, employing asynchronous API calls and leveraging Git for version control to ensure seamless integration of real-time communication features, enhancing the transparency and responsiveness of the hiring process.

Technologies

NEXTJS, React, Angular, Github

Project: Rental Management System (RMS)

The Rental Management System, an innovative project meticulously crafted by our team, redefines the rental landscape. This sophisticated platform offers users a seamless experience to effortlessly discover and reserve vacant rooms in hotels and various accommodations. By streamlining the booking process, it provides an efficient and sophisticated solution for individuals seeking temporary lodging.

Responsibilities

- Led the creation of an aesthetically pleasing and user-centric front-end for Rental Management System, ensuring a visually appealing interface that enhances user engagement.
- Implemented responsive design principles for consistent accessibility across devices, contributing to a seamless and inclusive user experience.
- Developed dynamic features, including real-time updates and an intuitive booking process, to elevate the overall user experience in alignment with the application's goal of providing a smooth rental reservation platform.

Technologies

NEXTJS, React, Angular, Github

SKILLS

- ·Front-End: HTML, CSS, Tailwind, JavaScript, TypeScript, React, NextJs.
 - ·Responsive Design, Cross-Browser Compatibility.
 - ·Version Control: Git, GitHub
 - ·RESTful APIs
 - ·Strong problem-solving and debugging skills
 - Communication skills
 - Attention to detail and accuracy in completing tasks
-
